MARCH 2024

Leader's Message

Happy first day of spring! The official start of the season begins today with the spring equinox, a moment of balance when day and night are nearly equal in length. The vibrant colors of flowering tulip trees and cherry blossoms in bloom are creating a stunning sight in Sonoma, Napa, and Marin Counties, marking the transition from winter to the lively awakening of spring.

As we celebrate the vibrant energy of spring, we would also like to honor the remarkable contributions and achievements of the women on our team and in the landscaping industry. March is Women's History Month, so let's recognize the resilience, leadership, and impact of women shaping our community. We are always looking for talented women to join our team – if you are passionate, driven, and ready to make a difference, we invite you to explore the

opportunities available [here](#).

With Appreciation,

JJ Fitzgerald
Chief Operating Officer

March Mulch Madness

Spring is quickly approaching, and the next few weeks are the optimal time to install new mulch on your property. We recommend replenishing your beds with mulch every 1 to 2 years to maintain a layer at least 2" thick.

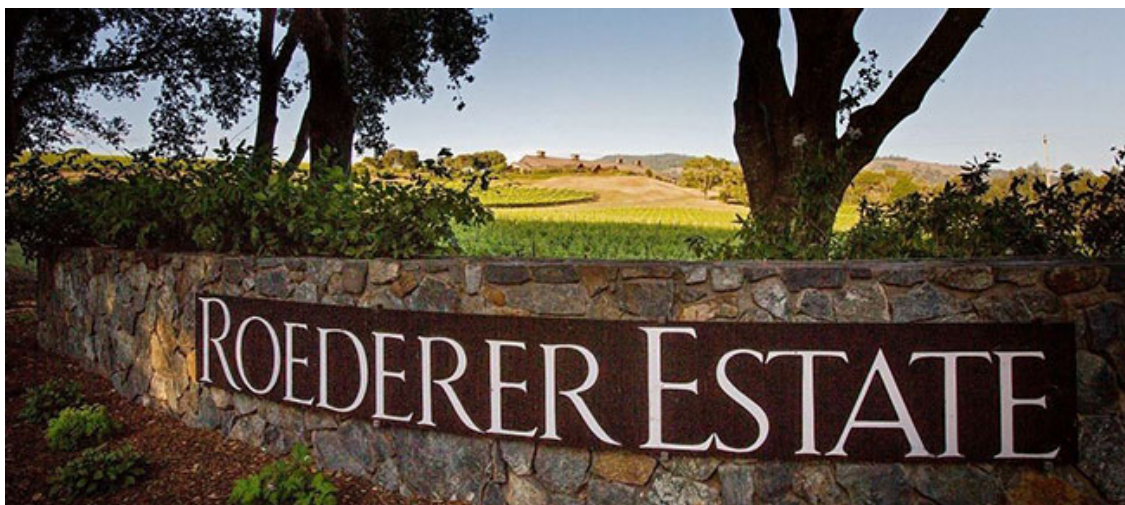

In addition to beautifying your landscape by bringing a pop of color and freshness to your property, the benefits include:

- Water conservation
- Weed suppression
- Reduces the need to apply herbicides
- Provides nutrients for your plants
- Protects irrigation drip system from sun damage and foot traffic
- Covers or fills potential tripping hazards
- Prevents soil erosion

- Playground mulch provides a protective surface to reduce the risk of injuries (and State law requires a certified playground fiber be maintained 12" thick)

If you haven't already joined in on the March Mulch Madness, now is the time! There are many varieties available. We would be happy to meet onsite with samples if you prefer to see the products in person. If you have any questions about mulching or landscape maintenance in general, please [contact us](#) today.

GraniteCrete Walkway Installation at Roederer Estate

Our construction team recently finished installing a [GraniteCrete, Inc.](#) walkway at [Roederer Estate](#) in the beautiful Alexander Valley.

GraniteCrete is a permanent form of decomposed granite offering a lasting solution with a natural aesthetic. [GraniteCrete, Inc.](#) is an excellent alternative paving material with a permeable surface, allowing water to pass through at over an inch per hour and promoting the recharge of our groundwater.

Available in various colors and compliant with ADA standards, it serves as an environmentally friendly option. Landesign is a certified GraniteCrete installer - call us today to install your next project!
