

Happy Mother's Day

Volume 7, Issue #5

Now is the time for Weed Abatement

Founders Message - Congratulations!

At Landesign, we continue to foster a positive culture with our employees. It gives us great satisfaction knowing that we are providing and supporting educational opportunities for the development of our hard working team. Our goal is to optimize our employee's motivation and retention in addition to providing educated and informed employees to serve our customers. Thanks to all our clients for helping make this goal possible!

Please join us in congratulating our Spray Technician, Jeff Williams, on earning his (QAL) Qualified Applicator License!

We are excited to celebrate the 5 year work anniversaries of Bob Drews and Stacy Dedrick this month! Bob is the Construction Division Manager, and he does a great job of leading multiple projects with great care and detail. He says, "We are fortunate to have rebounded strongly from the economic downturn, and are excited to see the increase in construction activity and the ease in building restrictions".

Stacy started his career with Landesign as an irrigation technician and was later promoted to manage the Irrigation Division. He is an expert in installing, maintaining and repairing all irrigation systems. He has transitioned to the role of Account Manager over the last two years, providing hands-on quality and care that goes above and beyond. We are grateful for everything he does!

Jeff Williams

Bob Drews

Stacy Dedrick

Thank you to Jeff, Bob and Stacy for their accomplishments with Landesign!

Wishing you a joyful Spring,

John and Denise Fitzgerald
Landesign C&M, Founders

Weed Abatement:

Property owners are responsible to maintain their high weeds throughout the dry season (typically May 15th through November 1st). In order to remain in compliance with your local municipality, you must maintain the high weeds throughout the dry season.

Please contact [the office](#) or your account manager to discuss our high weed abatement services offered, or [click here](#) to send us a message!

Fire Safe precautions that we can help you follow, some of which are required by law:

- Remove dead limbs overhanging your roof and any limb within 10 feet of your chimney
- Create common areas between buildings, and prune areas of heavy vegetation that are a threat to both structures
- Clear away any flammable vegetation within 10 feet of wood piles, liquefied petroleum gas (LPG) tanks and any fuel storage containers
- Clear pine needles, leaves or other debris from the roof of your property and any other buildings on your property
- The defensible space should extend at least 30 feet out from your buildings in all directions

For more information regarding fire safety in your area, go to these links:

Chalk Hill Estate Winery: Vegetable Gardens Installation

Chalk Hill Estate Winery located in Healdsburg, has extensive organic gardens which provide their Estate Executive Chef with a bounty of fresh herbs, fruits and vegetables including many heritage varieties - that are used in specially-created dishes designed to showcase their wines.

Landesign installed these expansive clover-shaped veggie gardens in September of 2016. The 26,000 square foot garden consists of dry stacked stone walls, subsurface tech-line irrigation (In-line Drip), and a smart irrigation controller with a rain sensor. This project was designed by Landscape Architect Don MacNair with **MacNair Landscape Architecture**.

Do you have a landscaping project in mind?
